

Ganavi

Computer Science & Engineering Student · Full-Stack Developer

GitHub: github.com/Ganavi0608

PROFILE

Computer Science student focused on full-stack web development. Experienced with React, Next.js, Node.js, Express, MongoDB, Supabase and modern development workflows. Interested in building practical, responsive and user-focused products.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React, Next.js, Tailwind CSS, Figma

Backend: Node.js, Express.js, REST APIs, Postman

Database: MongoDB, MongoDB Atlas, Supabase, SQL, SQLite

Tools: Git, GitHub, VS Code, Zustand, Firebase

PROJECTS

Fixibly — Field Service / Technician Portal

Worked on technician workflows including assigned jobs, status updates, notifications, emergency requests, availability and location management. Stack: Next.js, React, Node.js, Express, Supabase, Zustand.

Student Resource Sharing Platform

Full-stack platform for sharing academic resources with authentication, file uploads, metadata, search/filtering, previews, ratings and comments. Stack: Next.js, Express, MongoDB, JWT, Multer.

Hospital Appointment System

Healthcare application concept combining a React interface with a C++ backend workflow.

Fraud Alert Notification System

Real-time notification application demonstrating event-driven fraud alert communication using Node.js and Socket.IO.

HealthTech Prescription Management

Prescription-management application focused on structured healthcare data and backend operations using Node.js and SQLite3.

INTERESTS & LEARNING

Data Science & Machine Learning · UI/UX & Design Thinking · Modern Full-Stack Architecture · Cloud & Deployment
